

# Art in America

October 2017

## THE BRIEF

*A concise guide to some of the most exciting exhibitions, art fairs, and festivals opening in October.*

### ART AND MACHINES

Organized by CCA Wattis director and chief curator Anthony Huberman, the group exhibition "Mechanisms" considers how artists engage with machines and conceptual frameworks that structure everyday experience. Sculptures, photographs, videos, paintings, and installations by artists such as Park McArthur, Neil Beloufa, Cameron Rowland, and Danh Vo explore the fraught nature of contemporary "efficiency," both physical and social.

*CCA Wattis Institute for Contemporary Arts, San Francisco, Oct. 12, 2017–Feb. 24, 2018; Secession, Vienna, summer 2018.*
